Numeris Small Profile Price Book L2- EURO

by Digilock®

Numeris® small profile keypad and RFID camlocks offer a simplified security solution designed for file cabinets, storage, and casegoods.

Providing secure personal storage for a growing mobile workforce is essential. Numeris secures storage using a simple keypad entry or RFID credential.

Key Operated

features

- Operated by a user code or user key
- Inside or recess mounted
- Visual and audible indicators
- Shared or assigned use
- Powered by 3 AA batteries
- 2-3 year battery life
- 2-year product warranty

Numeris Camlock Keypad locks operate with any combination, up to a total of 20, User Key(s) and User Code(s).

Numeris keypad cam locks function by entry of a User Code (4-7 digits) or touching a User Key.

In shared use functionality, the user chooses an available storage unit and operates it with a self-selected user access credential (code or key). Once the storage unit is vacated, it becomes available for a different user.

Card Operated

features

- Operated by a RFID card or user key
- Inside or recess mounted
- Visual and audible indicators
- Shared or assigned use
- Powered by 3 AA batteries
- 2-3 year battery life
- 2-year product warranty

Numeris Camlock Keypad locks operate with an RFID card, up to a total of 20 cards.

In assigned use functionality, an RFID Card is assigned to operate the lock.

To unlock, the user presents the assigned RFID Card then rotates the knob to the unlocked position. To lock, the user closes the door then rotates the knob to the locked position.

Management staff operates the lock with either the Programming Key unique to the lock group or any registered Manager Bypass Key.
